California State Water Resources Control Board

UST Leak Detection Equipment and Methods

Y2K Compliance Status Report

The following is a list of Y2K compliance status for leak detection equipment and methods. It consists of responses from 54 of the 82 leak detection equipment vendors in our database. The remainder of vendors either could not be contacted (15) or did not respond to the survey (11). The information is listed alphabetically by manufacturer, and is based on manufacturer response to the survey conducted by the State Water Resources Control Board. The State Water Resources Control Board can **NOT** verify the accuracy of the manufacturer's response to this survey, and is providing this list for informational purposes only.

❖ If you can not find a particular piece of equipment, or require further information on the Y2K compliance status, please contact your vendor or equipment manufacturer.

❖ If you are a leak detection equipment vendor and your products are not included in the tables below, or if you note any errors or omissions, please contact the Senior Engineer in charge of this project, Ms. Shahla Farahnak, at farahnas@gwgate.swrcb.ca.gov.
